TOXICOLOGY

SUBJECT INDEX

Volume 50

Acetaminophen, calcium, phosphorylase *a*, hepatotoxicity, glutathione, buthionine sulfoximine, 157
Acetylcholine, barium, potassium, cadmium, calcium, catecholamines, adrenal medulla, 37
Adrenal medulla, barium, acetylcholine, potassium, cadmium, calcium, catecholamines, 37
Alkaline phosphatase, cadmium, copper, zinc, osteomalacia, bone formation, 303
Amino acid uptake, sea urchin, eggs, mercury, Na transport, fertilization, 217
Animals, aspartame, toxicity/tolerance studies, hazards, humans, behavioural studies, 1
Aspartame, toxicity/tolerance studies, hazards, humans, animals, behavioural studies, 1

B6C3F$_1$ mice, nickle oxide, nickle sulfate, nickel subsulfide, lung toxicity, F344/N rat, 145
B6C3F$_1$ mouse, 1,2-epoxybutane, nasal lesions, F344/N rat, inhalation exposure, 69
Barium, acetylcholine, potassium, cadmium, calcium, catecholamines, adrenal medulla, 37
BGG, Zn-protoporphyrin, heme oxygenase, cytochrome *P*-450, drug metabolism, bromobenzene, thioacetamide, tumor-bearing rat, 169
Behavioural studies, aspartame, toxicity/tolerance studies, hazards, humans, animals, 1
Beta-naphthoflavone, colon, enzyme induction, 1,2-dimethylhydrazine, DNA alkylation, 181
Bone formation, cadmium, copper, zinc, osteomalacia, alkaline phosphatase, 303
Bone loss, cadmium, pregnancy, lactation, 193
Bromobenzene, Zn-protoprophyrin, heme oxygenase, cytochrome *P*-450, drug metabolism, BCG, thioacetamide, tumor-bearing rat, 169
Buthionine sulfoximine, acetaminophen, calcium, phosphorylase *a*, hepatotoxicity, glutathione, 157

Cadmium, barium, acetylcholine, potassium, calcium, catecholamines, adrenal medulla, 37
Cadmium, bone loss, pregnancy, lactation, 193
Cadmium, copper, zinc, osteomalacia, bone formation, alkaline phosphatase, 303
Cadmium, kidney, pregnancy, lactation, 205
Cadmium resistance, metallothionein gene, methylation, 231
Calcium, acetaminophen, phosphorylase *a*, hepatotoxicity, glutathione, buthionine sulfoximine, 157
Calcium, barium, acetylcholine, potassium, cadmium, catecholamines, adrenal medulla, 37
Catecholamines, barium, acetylcholine, potassium, cadmium, calcium, adrenal medulla, 37
Chemiluminescence, human PMNL, mercury, phagocytosis, lysosomal enzymes, cytotoxicity, 247
Chest wall compliance, ozone, post-exposure effects, respiratory bronchiolitis, lung collagen, 131
Clotrimazole, ketoconazole, miconazole, enzyme induction, cytochrome *P*-450, mixed-function oxidases, 283
Colon, enzyme induction, beta-naphthoflavone, 1,2-dimethylhydrazine, DNA alkylation, 181
Copper, cadmium, zinc, osteomalacia, bone formation, alkaline phosphatase, 303
Cytochrome *P*-450, clotrimazole, ketoconazole, miconazole, enzyme induction, mixed-function oxidases, 283
Cytochrome *P*-450, Zn-protoporphyrin, heme

oxygenase, drug-metabolism, bromobenzene, BCG, thioacetamide, tumor-bearing rat, 169
Cytotoxicity, human PMNL, mercury, chemiluminescence, phagocytosis, lysosomal enzymes, 247

1,2-Dimethylhydrazine, colon, enzyme induction, beta-naphthoflavone, DNA alkylation, 181
Dimethylthiourea, paraquat, pharmacokinetics, 47
DNA alkylation, colon, enzyme induction, beta-naphthoflavone, 1,2-dimethylhydrazine, 181
Drug-metabolism, Zn-protoporphyrin, heme oxygenase, cytochrome *P*-450 bromobenzene, BCG, thioacetamide, tumor-bearing rat, 169

Eggs, sea urchin, mercury, amino acid uptake, Na transport, fertilization, 217
Enhancement of epoxide hydrolase, miconazole, inhibition of cytochrome *P*-450, 269
Enzyme induction, clotrimazole, ketoconazole, miconazole, cytochrome *P*-450, mixed-function oxidases, 283
Enzyme induction, colon, beta-naphthoflavone, 1,2-dimethylhydrazine, DNA alkylation, 181
1,2-Epoxybutane, nasal lesions, F344/N rat, B6C3F$_1$ mouse, inhalation exposure, 69
Experimental alveolitis/bronchiolitis, lung glutathione and cysteine, plasma and hepatic thiols, redox balance, 331
Extrahepatic organs, 3,4,3′,4′-tetrachlorobiphenyl, retinoids, reduction, rats, 317

F344/N rat, 1,2-epoxybutane, nasal lesions, B6C3F$_1$ mouse, inhalation exposure, 69
F344/N rat, nickle oxide, nickle sulfate, nickel subsulfide, lung toxicity, B6C3F$_1$ mice, 145
Fertilization, sea urchin, eggs, mercury, amino acid uptake, Na transport, 217

Glutathione, acetaminophen, calcium, phosphorylase *a*, hepatotoxicity, buthionine sulfoximine, 157
Glutathione, metallothioneins, hydroperoxide toxicity, iron chelator, radical scavenger, 257
Glycol ethers, hematopoietic toxicity, mice, residual bone marrow effect, 107

Halothane, hepatotoxicity, hyperthyroid, metabolism, piperonyl butoxide, 95
Hazards, aspartame, toxicity/tolerance studies, humans, animals, behavioural studies, 1
Hematopoietic toxicity, mice, glycol ethers, residual bone marrow effect, 107
Heme oxygenase, Zn-protoporphyrin, cytochrome *P*-450 drug-metabolism, bromobenzene, BCG thioacetamide, tumor-bearing rat, 169
Hepatotoxicity, acetaminophen, calcium, phosphorylase *a*, glutathione, buthionine sulfoximine, 157
Hepatotoxicity, halothane, hyperthyroid, metabolism, piperonyl butoxide, 95
Humans, aspartame, toxicity/tolerance studies, hazards, animals, behavioural studies, 1
Human PMNL, mercury, chemiluminescence, phagocytosis, lysosomal enzymes, cytotoxicity, 247
Hydroperoxide toxicity, glutathione, metallothioneins, iron chelator, radical scavenger, 257
Hyperthyroid, halothane, hepatotoxicity, metabolism, piperonyl butoxide, 95

Inhalation, 3-trifluoromethyl pyridine, olfactory epithelium, liver, nose, 57
Inhalation exposure, 1,2-epoxybutane, nasal lesions, F344/N rat, B6C3F$_1$ mouse, 69
Inhibition of cytochrome *P*-450, miconazole, enhancement of epoxide hydrolase, 269
Iron chelator, glutathione, metallothioneins, hydroperoxide toxicity, radical scavenger, 257

Ketoconazole, clotrimazole, miconazole, enzyme induction, cytochrome *P*-450, mixed-function oxidases, 283
Kidney, cadmium, pregnancy, lactation, 205

Lactation, cadmium, bone loss, pregnancy, 193
Lactation, cadmium, kidney, pregnancy, 205
Liver, 3-trifluoromethyl pyridine, olfactory epithelium, nose, inhalation, 57
Lung collagen, ozone, post-exposure effects, respiratory bronchiolitis, chest wall compliance, 131
Lung glutathione and cysteine, experimental alveolitis/bronchiolitis, plasma and hepatic thiols, redox balance, 331
Lung toxicity, nickle oxide, nickle sulfate,

nickel subsulfide, F344/N rat, B6C3F$_1$ mice, 145
Lysosomal enzymes, human PMNL, mercury, chemiluminescence, phagocytosis, cytotoxicity, 247

Mercury, human PMNL, chemiluminescence, phagocytosis, lysosomal enzymes, cytotoxicity, 247
Mercury, sea urchin, eggs, amino acid uptake, Na transport, fertilization, 217
Metabolism, halothane, hepatotoxicity, hyperthyroid, piperonyl butoxide, 95
Metallothionein, zinc, pancreas, mouse, 27
Metallothioneins, glutathione, hydroperoxide toxicity, iron chelator, radical scavenger, 257
Metallothionein gene, methylation, cadmium resistance, 231
Methylation, metallothionein gene, cadmium resistance, 231
Mice, hematopoietic toxicity, glycol ethers, residual bone marrow effect, 107
Miconazole, clotrimazole, ketoconazole, enzyme induction, cytochrome *P*-450, mixed-function oxidases, 283
Miconazole, inhibition of cytochrome *P*-450, enhancement of epoxide hydrolase, 269
Mixed-function oxidases, clotrimazole, ketoconazole, miconazole, enzyme induction, cytochrome *P*-450, 283
Mouse, metallothionein, zinc, pancreas, 27

Nasal lesions, 1,2-epoxybutane, F344/N rat, B6C3F$_1$ mouse, inhalation exposure, 69
Na transport, sea urchin, eggs, mercury, amino acid uptake, fertilization, 217
Nickel subsulfide, nickle oxide, nickle sulfate, lung toxicity, F344/N rat, B6C3F$_1$ mice, 145
Nickle oxide, nickle sulfate, nickel subsulfide, lung toxicity, F344/N rat, B6C3F$_1$ mice, 145
Nickle sulfate, nickle oxide, nickel subsulfide, lung toxicity, F344/N rat, B6C3F$_1$ mice, 145
Nose, 3-trifluoromethyl pyridine, olfactory epithelium, liver, inhalation, 57

Olfactory epithelium, 3-trifluoromethyl pyridine, liver, nose, inhalation, 57
Osteomalacia, cadmium, copper, zinc, bone formation, alkaline phosphatase, 303
Ozone, post-exposure effects, respiratory bronchiolitis, lung collagen, chest wall compliance, 131

Pancreas, metallothionein, zinc, mouse, 27
Paraquat, dimethylthiourea, pharmacokinetics, 47
Phagocytosis, human PMNL, mercury, chemiluminescence, lysosomal enzymes, cytotoxicity, 247
Pharmacokinetics, paraquat, dimethylthiourea, 47
Phosphorylase a, acetaminophen, calcium, hepatotoxicity, glutathione, buthionine sulfoximine, 157
Piperonyl butoxide, halothane, hepatotoxicity, hyperthyroid, metabolism, 95
Plasma and hepatic thiols, experimental alveolitis/bronchiolitis, lung glutathione and cysteine, redox balance, 331
Post-exposure effects, ozone, respiratory bronchiolitis, lung collagen, chest wall compliance, 131
Potassium, barium, acetylcholine, cadmium, calcium, catecholamines, adrenal medulla, 37
Pregnancy, cadmium, bone loss, lactation, 193
Pregnancy, cadmium, kidney, lactation, 205

Radical scavenger, glutathione, metallothioneins, hydroperoxide toxicity, iron chelator, 257
Rats, 3,4,3′,4′-tetrachlorobiphenyl, retinoids, extrahepatic organs, reduction, 317
Redox balance, experimental alveolitis/bronchiolitis, lung glutathione and cysteine, plasma and hepatic thiols, 331
Reduction, 3,4,3′,4′-tetrachlorobiphenyl, retinoids, extrahepatic organs, rats, 317
Residual bone marrow effect, hematopoietic toxicity, mice, glycol ethers, 107
Respiratory bronchiolitis, ozone, post-exposure effects, lung collagen, chest wall compliance, 131
Retinoids, 3,4,3′,4′-tetrachlorobiphenyl, extrahepatic organs, reduction, rats, 317

Sea urchin, eggs, mercury, amino acid uptake, Na transport, fertilization, 217
Sex differences, skin tumorigenesis, shale-oil toxicology, 83
Shale-oil toxicology, skin tumorigenesis, sex differences, 83
Skin tumorigenesis, shale-oil toxicology, sex differences, 83

3,4,3′,4′-tetrachlorobiphenyl, retinoids, extrahepatic organs, reduction, rats, 317

Thioacetamide, Zn-protoporphyrin, heme oxygenase, cytochrome *P*-450, drug-metabolism, bromobenzene, BCG, tumor-bearing rat, 169
Toxicity/tolerance studies, aspartame, hazards, humans, animals, behavioural studies, 1
3-Trifluoromethyl pyridine, olfactory epithelium, liver, nose, inhalation, 57
Tumor-bearing rat, Zn-protoporphyrin, heme oxygenase, cytochrome *P*-450, drug-metabolism, bromobenzene, BCG, thioacetamide, 169

Zinc, cadmium, copper, osteomalacia, bone formation, alkaline phosphatase, 303
Zinc, metallothionein, pancreas, mouse, 27
Zn-protoporphyrin, heme oxygenase, cytochrome *P*-450, drug-metabolism bromobenzene, BCG, thioacetamide, tumor-bearing rat, 169
